

URIEL LARA CASTRO

JR DEVELOPER

I am a mechatronics engineer with experience in industrial automation and a degree in Computer Systems Engineering. I am currently seeking my first professional opportunity as a software developer. My focus is on continuing to learn and bringing value to innovative teams in the field of software development.

WORK EXPERIENCE

Travel Agent (Remote)

Adventure Holidays • June 2023 - Present

- Developed solutions to automate client tracking using Excel macros, improving process efficiency by 20%.
- Planned personalized experiences for clients, demonstrating skills in data analysis and attention to detail to offer precise solutions.
- Managed relationships with suppliers and clients, mitigating risks by ensuring the timeliness and quality of bookings, which strengthens my management and communication skills.

Maintenance Technician

Beumer Group, Mexico • June 2022 - June 2023

- Reduced downtime in automated systems by quickly and effectively identifying and resolving technical issues.
- Programmed and optimized automated systems using Siemens PLCs, improving process performance.
- Conducted preventive and corrective maintenance of systems, ensuring long-term functionality and improving operational reliability.

Control Engineer

AR Mechatronics, Mexico • May 2021 - June 2022

- Optimized automated systems by programming Siemens PLCs, which increased productivity and operational efficiency.
- Implemented preventive and corrective maintenance solutions, ensuring the continuity of production processes.
- Managed inventories and logistics coordination to ensure the availability of materials and equipment, strengthening my organizational and teamwork skills.
- Handled procedures for the integration of new suppliers and employees, ensuring compliance with workplace safety regulations.
